

Bootcamp Info Sheet

Instructor

Name: Joy Hopkins (she/they)

Bio: Joy has more than 15 years experience in education. After an extensive career in the nonprofit sector, they transitioned to tech about 9 years ago. Joy has a deep background in the performing arts which is the foundation for both their communication and project management skills. Their data science expertise and passion lie primarily in data literacy, visualization, and storytelling. Joy has a Bachelor's degree from James Madison University and a Master's degree from American University.

Bootcamp Details

Bootcamp Title: Foundations of Data and AI Literacy for Managers

Number of Days: 4

Hours per Day: 3

Type of Instruction: Lecture with hands-on exercises, chat, and polling questions

Description: The course covers how to make decisions based on data through conducting analysis, interfacing with technical personnel to develop advanced instruments for decision-making, and incorporating AI into the day-to-day operations of a modern enterprise.

Target Audience: This course is intended for managers and supervisors of teams of non-technical personnel seeking to understand the fundamentals of data and AI, and learn how to leverage these technologies to enhance their work and support their company's data-driven growth.

Technologies: *Learners need to be able to access Zoom and be able to open PDF files (class slides and participant guide).*

Prerequisites: *No background in math or data analysis is required. We recommend that attendees have experience managing teams.*

Student References: *Class slides and participant guide with description of class activities.*
